

STUDIO TROPICANA

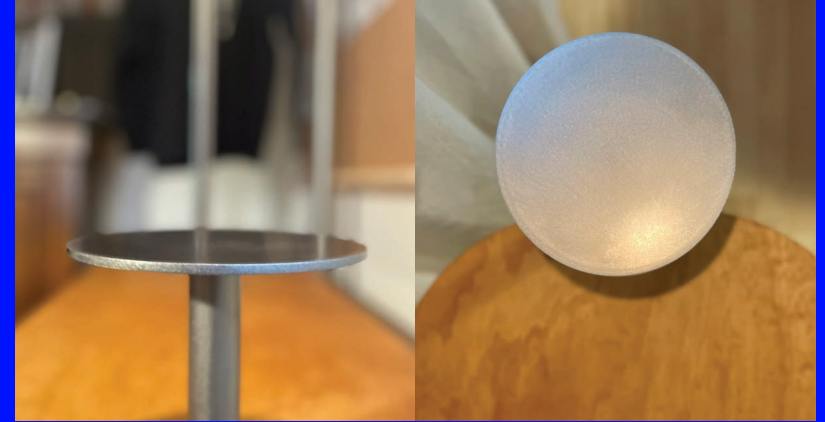

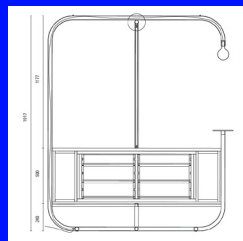

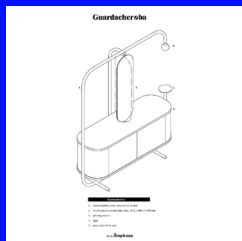

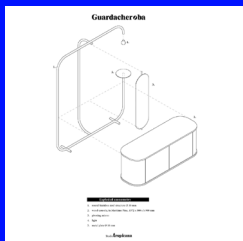

Founded in 2023 by Martina Palocci and Alessandro Farina, Studio Tropicana is a design and architecture firm that specializes in tailor-made solutions for a diverse range of creative projects. At Studio Tropicana, we strive to strike a perfect balance between the present reality and the future we aspire to create. As an emerging architecture firm, we are motivated by the opportunity to push the boundaries of what is possible and create something truly unique. Architecture has the power to shape the way we live, work, and interact with each other, and our desire is to have a positive impact on society through designing spaces that are beautiful, functional, and sustainable. We believe in a multidisciplinary and open-minded design philosophy, where there are no divisions of roles.

Guardacheroba

Initially developed for a private home, «Guardacheroba» represents much more than an ordinary piece of furniture; it is a functional element that combines elegant design with a touch of humor. Its inspiration stems from the eternal challenge of reconciling necessity and creativity in everyday life. The concept is an open closet with soft and sinuous shapes, playing on the contrast between the warm material of wood and the cold of metal, between opening and closing elements, between wanting to expose and hide. Guardacheroba creates a sense of space with its surroundings. A simple brushed steel structure becomes a display rod that wraps around and supports a Maritime Pine wood console. A rotating mirror, a pocket emptier and a lamp complete «Guardacheroba» creating a visual belonging to each other or to the parts of an ensemble.

Guardacheroba is made in Italy.
